EXPERIENCE

General Electric Digital, Cincinnati, Ohio

September 2016 - Present

Data Analytics, Senior Technical Program Manager

- Ensures the successful end-to-end delivery of a product through upfront client engagement. Contributes to a variety of functions in the executive domain. Responsibilities include the delivery of multiple products, management of issues, roadblocks, dependencies, and communication. Facilitates development and release planning using Agile methodologies such as Scrum.
- Responsible for leading two development teams. Each team consist of 5-6 developers and 1 scrum master. Both teams develop products for the Quality organization of the aviation supply chain devision.

General Electric Aviation, Cincinnati, OH

May 2013-August 2016

Digital Technology Leadership Program

- DTLP is a two-year program with four rotational job assignments focused on top GE IT initiatives. As a DTLP, my responsibilities were to lead by acting—gaining real world experience working on high priority and challenging projects. The projects included ERP implementation, Data Analytics, Cyber-security, and IT Auditing.
